

DARSHIKA JAIN

PRODUCT DESIGNER

SUMMARY

I am a Product Designer with over 2 years of experience owning AI-powered learning tools, gamified coding systems, and community platforms from research and information architecture to design systems and implementation. I excel in leading cross-functional teams and delivering scalable systems that enhance learner experiences and engagement

EXPERIENCE

DataSense

Remote, India

Product Designer

12/2023 - 12/2025

A company specializing in educational technology

Led product strategy and execution across 5+ EdTech platforms, growing from UI design to full product ownership while coordinating cross-functional teams and building scalable systems for thousands of learners

Scoped and shipped multiple 0-to-1, 12-week MVPs, driving product definition, prioritization, and close collaboration with engineering on implementation

DataSense LevelUp

Product Manager + Lead Frontend Developer

09/2025 - 12/2025

AI-Guided Coding & Learning Platform

Defined structured learning architecture (Module → Lesson → Step → Topic) with AI hints and split-view CodePad + Notes, reducing cognitive load and improving 'next-step' clarity and learner confidence

Designed scalable teacher lesson builder and admin panel, coordinating with engineering on backend and database to support content delivery to thousands of students

DataSense Resume Builder

Product Designer + Full-Stack Developer

07/2025 - 09/2025

Owned features end-to-end from concept to launch, defining user journeys and UI patterns to deliver an MVP in 6 weeks

Built the frontend and contributed to backend logic and database design, enabling independent resume creation in usability tests

DataSense Battleground

Product Designer + Frontend Contributor

10/2024 - 03/2025

Coding Challenge Platform

Designed and shipped end-to-end competitive coding system (matchmaking, timed problems, real-time results, challenge history) within 8 weeks from kickoff to launch

Increased practice frequency through gamification and time-based competition, with clear navigation enabling testers to complete challenges independently

DataSense 3D 'Explore City'

3D Experience / UX Designer

01/2023 - 03/2023

Designed a gamified 3D exploration prototype in Spline and basic Blender in 4 weeks to validate immersive learning concept as an alternative to traditional flat interfaces

DataSense Learning Platform

Product Designer

12/2023 - 08/2024

Led UX for DataSense's first learning platform and guided a junior dev team through handoff, contributing to 20%+ improvement in user engagement and organic growth

📍 Remote, India

EDUCATION

Gyan Ganga College of Technology

Bachelor of Technology - Computer Science

Jabalpur, Madhya Pradesh

08/2020 - 06/2024

SKILLS

UX & Visual Design

Wireframing & User Flows • IA & Prototyping • Design Systems • Gamification Mechanics • Component Thinking

Research & Product Thinking

User Research • Product Discovery • Defining Problem Statements • Success Metrics • MVP Scoping • Prioritization • Roadmap-Aligned Feature Planning • Cross-Functional Collaboration • Collaboration With Engineering • Collaboration With PM • Prototyping End-To-End Flows

Tools

Figma • FigJam • Framer • Spline • Jira • Miro • Adobe XD • AI Tools

Technical Fluency (Bonus)

React • Modern JavaScript • Component-Based Architecture • SQL Basics • Supabase • Python • Three.js • Unity3D • AR/VR • Git • GitHub

SKILLS

Domain Expertise

EdTech • Learning Platforms •
Community Platforms • AI-assisted
Learning • LLM Chatbots • Guided
Learning • Gamification • Timed
Challenges • Streak Mechanics

PERSONAL PROJECTS

GradeGenie

04/2025 - Present

AI-powered study management platform

Building an AI-powered study management platform with reusable React components, integrated calendar/planner, streak-based motivation, adaptive learning flows, AI chatbot, and multi-role dashboards

TogetherUp

01/2026 - Present

Relationship Growth Platform

Designed a privacy-first relationship platform with shared goals, daily micro-messages, and secure pairing, validated via user interviews

KEY ACHIEVEMENTS

Smart India Hackathon 2022 - National Winner

Selected as the top team in a national hackathon, leading to the development of a web-based XR platform that streams key national events using immersive technologies

Kavach Cybersecurity Hackathon 2023 - National Finalist

Led a team to develop an AI/ML and computer-vision system to enhance public safety through real-time alerts and incident logging

Eureka! IIT Bombay 2023 - Finalist

Reached the finals of Asia's largest business model competition, focusing on an AR/VR fashion startup
